

PUNCTURE-RESISTANT GEO FABRIC WITH A VAPOR BARRIER

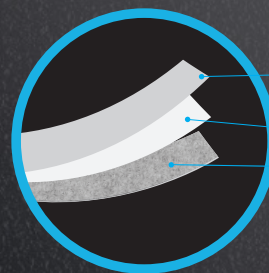

Geo Pro Vapor Barriers

ENGINEERED FOR TOUGH SOIL CONDITIONS

DESCRIPTION

The YCS Geo-Pro Vapor Barrier combines a polypropylene geo fabric with a 0.00 perm polyethylene vapor barrier, for wet, rocky soils. It is puncture-resistant and features a padded felt bottom for effective water management. Flexible and glossy, it ensures durability and easy installation for crawl spaces and basements.

The YCS Geo Pro line features patent-pending, premium crawlspace solutions for both wall and ground applications. This line includes a wall liner and a durable vapor barrier, combining polypropylene geo fabric with a 7-layer, 0.00 perm polyethylene coating for superior moisture and puncture resistance. Engineered for tough soil conditions, Geo Pro products effectively manage water and soil gas distribution, delivering long-lasting protection without delaminating or off-gassing.

Seven Layer Film
Reinforced with nylon
to improve strength
and abrasion

Polyethylene Coating
Polypropylene Fiber

PRODUCT BENEFITS

- Does not promote mold growth
- Proprietary Product
- Lifetime warranty
